UTP Telco Patch Panel

When installed as part of a flood wired structured cabling system, Connectix Telco Patch Panels provide the option to run data and telecommunications across the same network.

Connectix Telco Panels are available in three different variants, 16 RJ45 to 1 x 50 Way Telco, 24 RJ45 to 1 x 50 Way Telco and 24 RJ45 to 2 x 50 Way Telco. The panels consist of RJ45 sockets and Telco connectors. Telco leads are patched into the female sockets in the rear of the panel and the circuitry then integrates the Telco connections and RJ45 jacks.

The panels provide hook and loop cable retainers at either end for bundling cables. Each RJ45 port is numbered with a removable designation label protected by an acetate strip. For wiring specifications please see our 'Information' section 15.5.

Features and Benefits

- Allows telecommunications on a data network
- Individually QA tested
- Attractive black finish
- Hydra Telco leads made to order
- Manufactured in the UK

Ordering Information

Product Description	Part Number
16 RJ45 to 1 50 Way UTP Patch Panel	009-004-001-16
24 RJ45 to 1 50 Way UTP Patch Panel	009-004-001-24
24 RJ45 to 2 50 Way UTP Patch Panel	009-004-002-24

Product Specifications

Width	483 mm (19")
Depth	35 mm
Height	1u (44 mm)
Fixing Centers	467 mm
Material	Aluminium alloy 6063 HE9/50s to BS1474
Finish	Black powder coat to BS6496
Socket Labels	9mm numbered card, with acetate cover
RJ45 Sockets	RJ45 unshielded vertical jacks
Cable Guide	Left or right cable entry with hook and loop retainers at either end
Telco Sockets	Female receptacles
Configurations	16 RJ45 to 1 50 way Telco/24 RJ45 to 1 50 way Telco/24 RJ45 to 2 50 way Telco
