

# SOHO, Home & AV Cabling

## Home Cabinets

Connectix Home Cabinets have been designed to be the heart of a state of the art home, or small office, networking system. The cabinets can house all core equipment and wiring terminations.

Available in 7, 10 and 11 U Cabinets, these key lockable units are ideal for installing Connectix 12 Way RJ45 Panels, and for distributing voice, data, ISDN, internet connection, TV, video and CCTV around a home or small office network.

The cabinet has two enclosed sections; one to house a 4-way power unit, and another for leads and incoming cables. The 10 and 11 U versions also have an additional section to house a mini switch.
