

Product Highlights

- **Compatible with your mobile devices**
Connect your smartphone, notebook, tablet anywhere you have a 3G connection
- **Share your Internet connection**
Use this portable router to share your Internet connection wirelessly
- **New HSPA+ Mobile technology**
Up to 21.6 Mbps download speeds over 3G networks
- **Rechargeable battery**
Increased mobility for hours of Internet access on the go
- **Advanced Security**
Built-in firewall and encryption ensures that your information remains secure when working from remote locations
- **microSD card slot**
Compact design, that allows you to carry files with you wherever you go
- **Unlocked**
Works with SIM cards from any operator

DWR-730

Portable HSPA+ 21 Mbps Router

Features

Interfaces:

- Standard 6-pin SIM card interface
- microSD card slot
- microUSB port

3G:

- Downlink up to 21.6 Mbps in HSPA+ mode
- Uplink up to 5.76 Mbps in HSPA+ mode

Wireless:

- 150 Mbps wireless speeds
- Compatible with 802.11n/g/b devices

Security:

- Built-in firewall
- WEP/WPA/WPA2 encryption
- WPS encryption button

Power:

- Standard USB wall plug
- Removable 1500 mAh Li-ion battery

The Portable HSPA+ 21 Mbps Router (DWR-730) allows you to connect your notebook, tablet and smartphone to the Internet from anywhere there is a 3G connection and share this connection with other users wirelessly. This router is ideal for people that need a portable solution, for example remote workers or people that are moving house and need a temporary Internet connection.

Share your 3G connection

You can use this router to share your 3G connection wirelessly. The router will use an available 3G connection to provide a fast and secure Wireless N 150 network for several users at the same time.

Practical Portability

This device is small enough to fit in your pocket: the rechargeable Li-ion battery means that you can take it with you anywhere and surf the Internet for hours, and if you need to recharge it, you can do it easily with any USB wall or car charger.

Optimal performance with HSPA+ technology

The portable router supports the latest High Speed Packet Access plus (HSPA+) technology, which offers data rates of up to 21.6 Mbps (5.76 Mbps upload) and helps to reduce latency. This router is also backwards compatible with mobile networks implementing HSUPA and HSPDA technologies.

Advanced Security

It may be small but it can keep your wireless connection as secure as if you were connected through your home broadband wireless LAN.
