Connectix Standard Faceplates are available in compact depth, single and dual gang versions, and have been designed to fit all industry standard modules.

All Connectix faceplates are supplied with fixing screws and come finished as standard in an attractive high gloss white.

Connectix backboxes are available in single and dual gang with a choice of surface mounted and flush mounted dry lined wall versions. Surface mount boxes feature knock outs for mini trunking adaptors.

Dry lining wall boxes are suitable for mounting into 6-14 mm thick board and can easily cope with irregular shaped aperture sizes. Swivelling snap out clamps will grip any standard thickness of building board tightly.
