4 Core Flat Cable - Black	001-008-004-41
RJ11, 4 Wire Plug	006-003-017-00

The Connectix range of voice products provides extensive solutions for telecommunication applications.

The modular designed 301A box connection allows 100 pairs, the 251A with built in cable management allows for 50 pairs, the 201D low profile allow 20 pairs and the 510 or 520 box connections with knock-outs allow side-by-side mounting for 340 and 680 pair cables.

Flush or surface mounting voice outlets in single and dual variants, with optional mixed telephone and data sockets for combined computer and telecommunication networks are available. Standard telephone extension leads in various lengths, and individual 237A IDC strips for use in box connection termination applications are also available.
