

Voice Cabling Products

Voice Converters

Connectix Voice Converters utilise a standard UK telephone socket and RJ45 plug to enable telecoms equipment to be connected to structured cabling systems. Available in Full Master, PABX and Secondary variants, the adaptors have a unique compact design, making them neat and attractive when installed.

The voice converters provide the end user with the flexibility to run various telecommunication applications including telephones and modems through an RJ45 modular outlet.

Using a voice converter eliminates the problems associated with installing separate telephone and data systems on the same premises. By flood wiring the network, installers can alternate between data and telecoms within the structured cabling system. They are supplied leaded in lengths of 50 mm and 150 mm, or in special lengths to order.

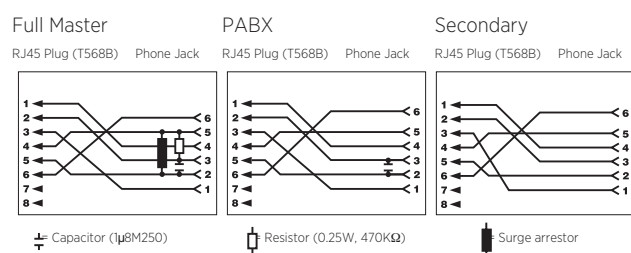

Features & Benefits

- Extra compact design provides a neat, compact and attractive installation
- Converts data outlets into telecommunication ports
- Individually QA tested
- White finish
- Available custom wired in various colours and lengths

Ordering Information

Product Description	Part Number
Full Master Voice Converter 150 mm	007-006-001-15X
PABX Voice Converter 150 mm	007-006-002-15X
Secondary Voice Converter 150 mm	007-006-003-15X
RJ45 - RJ11 Voice Converter 150 mm	007-006-001-07
ISDN - RJ45 Leaded Adaptor	00A-004-001-01
