

Copper Cabling Solutions

Compact Module - Category 6A FTP

Category 6A Compact Module is designed to provide one of the shallowest wall outlets on the market. They are the ideal solution wherever back-box depth is a problem.

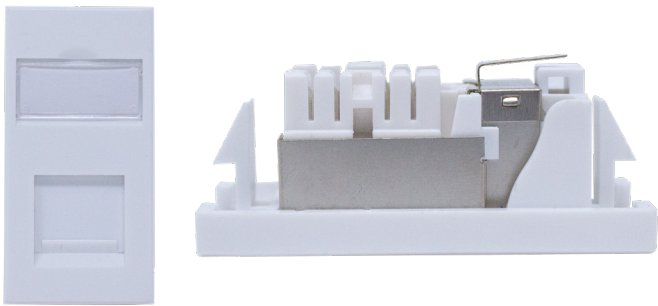

The attractive high gloss finish and easy to use labelling system are identical to all other Connectix Cabling Systems Modules, making them interchangeable in most applications.

Category 6A Compact Modules can be fitted into single or dual gang Euro size faceplates and can be combined with quarter blanks and/or voice modules to provide the required configuration.

Connectix Cat6A FTP modules are fully compliant with the ANSI/TIA Category 6A standards and provide an outstanding transmission medium, free from problems of alien cross talk. When used in conjunction with the Connectix Cat6A panels and cable the user will achieve a link performance far exceeding the Category 6A requirements

Features & Benefits

- Cat6A performance
- Shallow design requires minimal back-box depth
- Interchangeable with other Euro modules and ¼ blanks
- Industry standard IDCs
- Individually QA tested
- Also, available as PABX Secondary or Full Master Voice Module
- Suitable for 10 gigabit ethernet
- Easy to use shield connection

Product Specifications	
Width	25mm
Depth	22mm
Height	50mm
Back-box depth	Minimum 32mm recommended
Material	Polycarbonate/ABS thermoplastic resin with grade UL94 VO at 1.5mm flame retardancy
Finish	High gloss
IDC Labels	Individual colour coded labels to T568B
Cable Guide	Integrated earth connection / cable tie position
Sockets	High performance shielded RJ45
IDC Blocks	4-way industry standard IDC blocks
Conforms to	ANSI/TIA-568-C.2 Category 6A Specification
