

Wireless N Router TL-WR841ND

300Mbps wireless transmission rate with 2 antennas, brings smooth wireless N experience

MIMO, CCA™ technology, brings competitive performance in Draft 11n routers

QSS, Quick Secure Setup at a push of button

Description:

The TL-WR841ND Wireless N Router is a combined wired/wireless network connection device designed specifically for small business, office and home networking requirements. It provides a simple, very fast, pleasing way to access internet or Ethernet without cables for work or fun. It complies with the IEEE 802.11n (Draft 2.0) standard with wireless transmission speeds of up to 300Mbps. The router features 4 10/100M switch ports to achieve the most effective data transmission. TL-WR841ND adopts MIMO technologies, has two external detachable Omni directional antennas providing even better wireless performance, transmission rates, stability and coverage. CCA™ technology automatically avoids channel conflicts using its channel selection feature. It also works well with other 11g and 11n protocol wireless products. TL-WR841N also provides easy and quick security setup with WPS (WiFi Protected Setup) standard, get network safety at the push of a button.
